

Software AG's Developer Community

A Forum for Networking and Professional Development

If you use Software AG products such as Adabas, Natural, Tamino, or EntireX to build your mission-critical applications, Software AG's Developer Community is a powerful online resource that delivers news and information to help streamline your development efforts. In addition to providing a wealth of resources for enhancing efficiency and productivity, the Developer Community provides a unique opportunity for you to network with your peers and exchange information on best practices for success.

Whether you work for a Software AG customer or partner or are evaluating Software AG technology, you can take advantage of all the features and benefits Software AG's Developer Community offers:

- **News and event announcements**
 - Major product releases
 - User group and interest group meetings
- **Downloads**
 - Product documentation
 - Technical articles
 - White papers
- **Newsletters**
- **Discussion forums**
- **Demo zone**

Software AG's Developer Community does not replace existing support systems such as ServLine24 but serves as an additional resource with extended functionality. Read access is unrestricted; however, you must register to post items to discussion forums.
